A – Synthesis of powders
B – Ceramic processing (including: Innovative processing, manufacturing, additive manufacturing, HT processes, sintering)
C – Modelling, Simulation, characterization and digitalization of materials and processes (including process diagnosis for quality assessment/non-destructive testing)
D – Structural ceramics / Ceramic coatings / Porous ceramics
E – Functional ceramics (Dielectrics, Antiferroelectrics, Ion Conductors, Electronics, Piezoelectrics, Ferroelectrics, Multiferroics, Magnetics, Electrocalorics, Thermistors, Thermoelectrics)
F – Electronic Ceramics (Batteries; SOFC)
G – Ceramics for energy and environmental technology / Membranes
H – Ceramics and glasses for healthcare, Bioceramics and Optical ceramics, Bio-electroceramics
I – HT materials / Refractories / Composites
J – Silicate/Traditional ceramics, Arts + Design
K – ACerS-ECerS Joint Symposium
L – ICC9 Industrial and Educational Session
M – ECerS and JECS Trust Awards Ceremony
